§ 532.317 Use of data from the nearest similar area.

(a)(1) For prevailing rate employees other than those in the Department of Defense, the lead agency shall, in establishing the regular schedule under the provisions of this subpart, analyze and use the acceptable data from the nearest similar wage area together with the data obtained from inside the local wage survey area. The regular schedule for Department of Defense prevailing rate employees shall be based on local wage data only.

(2) The total number of job matches obtained from the nearest similar wage area shall be equal to the number required for adequacy in § 532.309(a) (2) and (3) of this subpart for appropriated fund surveys and § 532.309(b)(2) of this subpart for nonappropriated fund surveys.

(3) Data shall be selected for inclusion on the basis of the most populous survey jobs as determined by the weighted job matches found in the dominant industry in the selected reference area. In identifying survey jobs for which reference area samples will be included, the jobs required at limited grade ranges shall be selected before jobs in the unlimited grade range. When there is a tie in the selection procedure, the highest graded job shall be selected first.

(4) If there are two dominant industries for which data are obtained from nearest similar areas, the procedure described in paragraph (a)(2) of this section shall be applied independently for each of the specialized industries.

(b)(1) The wage rates established for a grade by using data from the nearest similar area may not exceed the wage rates for the same grade in the nearest similar area.

(2) If data are obtained from two nearest similar areas for two dominant industries, the wage rates established for a grade by using these data may not exceed the higher of the wage rates for the same grade in the two nearest similar areas.

(c) The wage data obtained from the nearest similar area or areas may not

be used to reduce the wage rates for any grade in the local area below the rates that would be established for that grade without the use of the data from the nearest similar area or areas.

Subpart D—Pay Administration

§ 532.401 Definitions.

In this subpart:

Change to lower grade means a change in the position of an employee who, while continuously employed—

(1) Moves from a position in one grade of a prevailing rate schedule established under this part to a position in a lower grade of the same type prevailing rate schedule, whether in the same or different wage area;

(2) Moves from a position under a prevailing rate schedule established under this part to a position under a different prevailing rate schedule (e.g., WL to WG) with a lower representative rate; or

(3) Moves from a position not under a prevailing rate schedule to a position with a lower representative rate under a prevailing rate schedule.

Equivalent increase means an increase or increases in an employee's rate of basic pay equal to or greater than the difference between the rate of pay for the grade and step occupied by the employee and the rate of pay for the next higher step of that grade, except in the situations specified in § 532.417 of this subpart. In the case of a promotion, the grade and step occupied means the grade and step to which promoted.

Existing scheduled rate of pay means the scheduled rate of pay received immediately before the effective date of a transfer, reassignment, promotion, change to a lower grade, within-grade increase, or revision of a wage schedule.

Highest previous rate means the highest scheduled rate of pay previously paid to a person while employed in a job in any branch of the Federal Government, a mixed-ownership corporation, or the government of the District of Columbia. It is based on a regular tour of duty under an appointment not
